

LORMA GOES DIGITAL!

Amlanan Tribune (Nov. 14-20), Ilocos Times (Nov. 23-29), Baguio Midland Courier (Dec. 6)

SAN FERNANDO, LA UNION – Lorma Medical Center recently purchased a new digital X-ray for its X-ray department. This completes the plan of offering fully digital x-ray services at Lorma.

In addition to being cost effective, going digital has many advantages:

- hazardous waste disposal is eliminated
- images taken are more accurate and exhibit clearer visuals so that re-shoots are unnecessary
- images can be permanently archived for future reference
- doctors can easily access the images from their computer, and
- processing of images is faster, since we get instant imaging results

The added efficiency digital x-rays bring is convenient for the Lorma radiologists and staff, especially when serving a great number of patients needing their x-ray results at the shortest possible time.

To schedule for x-ray services, call Lorma Medical Center at 072-700-0000 local 134.
